

Ouch! Do you have a product that can fix this?

Solutions

Tegra Medical can make it for you.

Manufacturing orthopaedic devices can be complicated, but the experts at Tegra Medical love the challenge. We're innovative problem-solvers who have successfully provided solutions to challenges like yours.

Whether you need PEEK or titanium implants, instruments, or complex assembled devices, we offer broad machining capabilities, laser processing and insert molding. All are manufactured in facilities that are ISO and FDA registered.

The growth path of your device might start with our GENESIS Tech Center,[®] where we help nurture your designs with prototyping and pilot production, then progress to full-scale production, and end with final assembly, packaging and sterilization.

Providing ingenious solutions for your orthopaedic challenges is just one of the hallmarks of Tegra Medical, along with speed and service.
