

Sometimes even the best ideas need a little help.

Service

Tegra Medical can turn your bright ideas into great products.

The GENESIS Tech Center® is a dedicated manufacturing space where we help get your products to market.

- Quick turnaround prototyping and pilot production — using the same type of manufacturing equipment as our lean production environment.
- Design for manufacturability and assembly — reduce costs, increase quality and shorten the development cycle.

- Robust engineering and quality processes — ensuring adherence to all requirements and specifications.
- Complete project management — we'll ease you through all phases, from design to assembly and beyond.

Tegra Medical: innovative solutions, comprehensive service and speedy turnaround to launch your prototypes.
