

At least some quality lapses still taste good

Quality

Quality means whole solutions

At Tegra Medical, quality is never a compromise. We understand that the components and devices we create are critical to health and well-being. So when we bring your medical device to life, we infuse stringent quality standards into every step.

Our arsenal of quality tools includes ISO certifications, FDA registration and QSR compliance, cGMP

practices, SPC, lean manufacturing, Six Sigma, special validations, Black Belt-certified engineers, and tools for risk management

Making quality a priority is just one of the hallmarks of Tegra Medical, along with providing solutions, speed and service for our customers.
