

Where medical devices come to life.®

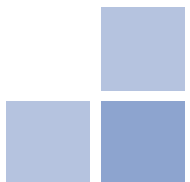

...and amazing people flourish.

Medical Device Apprentice Program

"I have a sense of pride in my work... and knowing that what I am making helps produce life saving components gives it added importance."

- A Toolmaker apprentice

Who Are We Looking For?

Apprentice candidates should have the following qualities:

- A willingness to learn and the desire to gain knowledge and develop new skills
- Mechanical aptitude and manual dexterity
- Effective communication skills and solid problem-solving skills
- Enthusiasm and self-motivation to complete projects and tasks
- Team player mentality and collaborative skills

Apprenticeship Experience

Are you looking for a path to success? Get hands-on, real-world experience and expand your knowledge as a paid apprentice. The Tegra Medical apprenticeship experience offers you the ability to earn while you learn. **Achieve an Associate degree or a Bachelor's degree and have your tuition paid for by the company all while earning a weekly pay.**

Choose your path, become a skilled Toolmaker, Swiss Machinist, Precision Grinding, Precision EDM or Precision Laser Operator on your way to a supervisory or management position with the company.

Focus Areas

State Certified *

- Toolmaker
- Swiss Machining
- Precision Finish Grinding
- Precision EDM (Electrical Discharge Machining)
- Precision Laser Machining

**Certified by the Massachusetts Division of Apprenticeship Standards (DAS)*

What's In It For You?

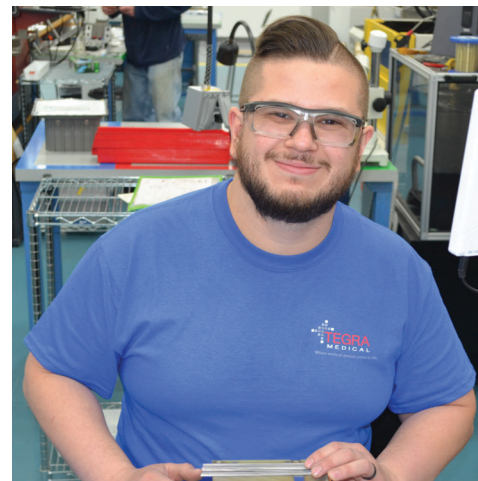

- Free education - Earn a degree without student loan debt.
- Paid internship - Take home a weekly salary while you learn new skills.
- Training - Gain knowledge and skills from professionals working in the field.
- Personal & professional growth - Develop communication and people skills that will help accelerate your career.
- Contribute to meaningful work - The medical devices we manufacture help save and improve the quality of people's lives.

Apprentice Locations

- Franklin, MA
- Dartmouth, MA

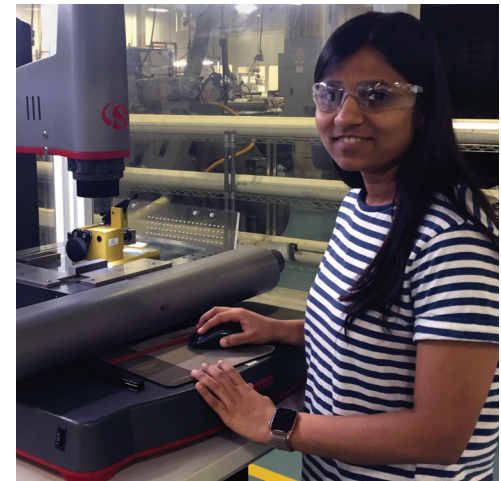

"I have the privilege of working with the best of the best journeyman toolmakers in all of New England. They are excellent teachers and are more than willing to share their many years of tool making experience with me to make sure I can become the greatest I can be."

- A Toolmaker apprentice

"Tegra Medical is helping me every step of the way, including paying for my programming and machining classes. There is a lot of room to grow and excellent job security. With the training I'm getting I hope to progress to becoming an engineer."

- A Swiss Machining apprentice
