

Apprentice Program

Join Our Team and Help Create Life-Changing Medical Devices

Could an Apprenticeship Be Your Career Path to Success?

Tegra Medical's paid apprenticeship program offers a unique opportunity to gain real-world experience while earning credentials for a career in manufacturing. You'll develop hands-on expertise in a skilled trade—all while earning a salary. And if you choose to pursue an Associate or Bachelor's degree, Tegra Medical will cover your tuition, allowing you to continue your education while training on the job.

Choose Your Path

Tegra Medical offers several career paths, including five state-certified programs. If your sights are set on a managerial role, an apprenticeship also offers the opportunity to gain additional experience to become a supervisor or manager with Tegra Medical.

State-Certified* Apprenticeship Programs

- Precision Machinist
- Maintenance Technician

*Certified by the Mississippi Apprenticeship Program (MAP)

Apprentice Location: Hernando, MS

What's In It For You?

- A willingness and desire to learn and develop new skills
- Mechanical aptitude and manual dexterity
- Effective communication skills and solid problem-solving ability
- Enthusiasm and self-motivation to complete projects and tasks
- Team player mentality and collaborative skills

About Us

Tegra Medical is a contract manufacturer known as the company “Where medical devices come to life.” We are headquartered in Franklin, MA, and have other manufacturing locations in Dartmouth, MA, Hernando, MS, Costa Rica, Europe, and Asia.

We offer true end-to-end contract manufacturing, starting with product development at our GENESIS Tech Center® and continuing through full-scale production, assembly, and packaging. Our expertise includes manufacturing complex components, assemblies, and finished devices, such as implants and both reusable and single-use devices. We serve a wide range of medical specialties, including oncology, ophthalmic, women’s health, advanced orthopedics, drug delivery, cardiovascular, cardiac rhythm management, minimally invasive surgery, robotic-assisted surgery, and more.

The medical devices we manufacture help save and improve the quality of people’s lives, and we are committed to delivering the highest level of precision, quality, and innovation to our customers.

Tegra Medical is helping me every step of the way, including paying for my programming and machining classes. There is a lot of room to grow and excellent job security. With the training I’m getting I hope to progress to becoming an engineer.”

— A Swiss Machining apprentice

I have a sense of pride in my work... and knowing that what I am making helps produce life saving components gives it added importance.”

— A Toolmaker apprentice

I have the privilege of working with the best of the best journeyman toolmakers in all of New England. They are excellent teachers and are more than willing to share their many years of tool making experience with me to make sure I can become the greatest I can be.”
